## Desactivar un entorno virtual

Hasta ahora, has creado un entorno virtual y le has añadido proyectos de Python y necesitas cambiar entre ellos.

Ejecuta el comando `deactivate`:

```
deactivate
```

Observa cómo cambia el mensaje de tu terminal `(env)` a cómo se veía antes.

¡Felicidades! Has logrado crear y usar correctamente un entorno virtual.

Curso Propedéutico de Python para Launch X - Innovación Virtual.

Material desarrollado con base en los contenidos de MSLearn y la metáfora de LaunchX, traducción e implementación por: Fernanda Ochoa - Learning Producer de LaunchX.
